**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tang (6,022,129).

3. Tang discloses all the structural limitations of claim one, therefore the limitations regarding the method of lighting are also disclosed by Tang.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tang.

6. Although Tang does not specifically recite the supports being controllably moved with the lights along a path to position each one of the supports at a selected location along the path, referring to figure 2 of Tang, reference numeral 6, referred to as "guide track", Tang suggests movement of the support and light along a path.

***Allowable Subject Matter***

7. Claims 12-19 are allowed.
8. Claims 3-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
9. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not teach the following
  - A light moving apparatus comprising a plurality of movable light supports, a light beam producing light mounted on each one of the supports, a track traversable by the supports of the lights, a power supply couplable to each one of the lights to energize the respective lights and **a drive mechanism for driving each one of the supports and lights along the track, independently of driving any other one of the supports and lights along the path.**
